- 02** Your Dashboard
- 03** Daily, Weekly & Monthly Planning
- 04** Goals & Habit Tracker
- 05** Finance Tracker
- 06** Meals, Water & Self-Care
- 07** Notes
- 08** Themes, Dark Mode & Printing
- 09** Your Data & Privacy
- 10** FAQ & Troubleshooting

Opening your planner for the first time

Mini Planner is a self-contained web app — there is nothing to install and no account to create. Everything runs locally, right inside your browser.

Step 1 — Unzip the folder

Extract the Premium-Planner folder you downloaded to anywhere on your computer (Desktop, Documents, wherever is easiest to find again).

Step 2 — Open index.html

Double-click **index.html** inside the folder. It will open in your default browser (Chrome, Safari, Edge and Firefox are all supported). That's the whole install process.

Step 3 — Explore the demo data

Your planner opens with realistic sample data already filled in, so you can see every module working immediately. Feel free to click around — nothing here is precious.

Step 4 — Make it yours

When you're ready, use the **Reset Demo Data** button in the sidebar to clear the samples and start fresh with your own information. Everything you type auto-saves to your browser as you go.

Tip: bookmark the index.html page (or pin the tab) so you can jump back into your planner in one click.

02 · YOUR DASHBOARD

Your whole day, at a glance

The Dashboard is your home base. Every time you open Mini Planner, this is what you'll see first.

Screenshot: the Dashboard, showing today's priorities, habit streaks, balance and water intake.

- ✓ A daily motivational quote and a live ring showing today's overall progress
- ✓ Quick-glance stat cards for tasks, habits, balance and water
- ✓ Your Top 3 Priorities for the day, pulled from the Daily Planner
- ✓ Today's Goal with a progress ring
- ✓ Habit streaks for every habit you're tracking
- ✓ Income vs. Expenses and Expense Breakdown charts, generated from your Finance Tracker

Daily, weekly & monthly planning

Zoom in or out depending on how far ahead you want to plan.

Daily Planner

- ✓ Top 3 Priorities to keep your day focused
- ✓ A simple to-do list with checkboxes
- ✓ Hour-by-hour schedule from 6 AM to 10 PM
- ✓ A “Don't Forget” list for the small things
- ✓ Today's Goal with its own progress bar

Weekly Planner

- ✓ Set 2–3 goals for the week with a progress ring
- ✓ Plan Monday through Sunday in dedicated columns
- ✓ A running weekly task list and a notes box

Monthly Planner

- ✓ A full interactive calendar for the month
- ✓ A Monthly Focus statement to anchor your priorities
- ✓ Important Dates so birthdays and deadlines don't sneak up on you

Screenshot: the Weekly Planner with goals, day-by-day tasks and notes.

Turn big goals into daily habits

Goal Planner

Every goal has room for the big picture and the small steps:

- ✓ Your Big Goal and why it matters to you
- ✓ Action steps you can check off one at a time
- ✓ A deadline, a reward, and a live progress percentage

Habit Tracker

Add any habit you want to build and tap a day to mark it complete.

- ✓ A full monthly grid for every habit you track
- ✓ Automatic streak counters and completion percentages
- ✓ A completion-rate chart across all your habits

Screenshot: the Habit Tracker with monthly grid and streaks.

Know where every rupee goes

Log your income and expenses to get an instant picture of your finances.

- ✓ Add multiple income sources and expense categories
- ✓ Set a savings goal and track progress with a live bar
- ✓ See an expense breakdown chart by category
- ✓ Follow your 6-month income vs. expense trend

Screenshot: the Finance Tracker with income, expenses and charts.

Meals, water & self-care

Meal Planner

- ✓ Plan breakfast, lunch, dinner and snacks for the day
- ✓ Keep a running grocery list with checkboxes

Water Tracker

- ✓ Tap a glass to log your water intake
- ✓ Set your daily glass goal and watch it fill in

Self-Care Planner

- ✓ Four categories: Physical, Mental, Emotional and Spiritual
- ✓ Simple checklists to make sure you're looking after yourself, not just your to-do list

Screenshots: Meal Planner and Water Tracker.

A catch-all for everything else

Sometimes you just need somewhere to put a thought before it disappears.

- ✓ Create rich text notes or checklist-style notes
- ✓ Pin your most important notes to the top
- ✓ Search and scan through everything you've saved

Screenshot: Notes with pinned notes and checklists.

Themes, dark mode & printing

Click the colored dots in the top bar to instantly switch between 5 themes: Violet, Green, Blue, Pink and Orange.

Click the moon / sun icon to toggle Dark Mode — ideal for evening planning sessions.

Printing & PDF export

Click the print icon in the top bar (or press Ctrl/Cmd + P) to print the current page, or choose “Save as PDF” in your browser’s print dialog to export it instead.

The 5 color themes, plus Dark Mode.

Your data & privacy

Mini Planner saves everything to your browser's local storage on your own device.

- ✓ Nothing is uploaded to any server — your information never leaves your computer
- ✓ Your data will still be there next time you open the same file in the same browser
- ✓ Using a different browser or a different computer starts a fresh copy
- ✓ Clearing your browser's site data/history for this file will also clear your planner data

Resetting the demo data

Click **Reset Demo Data** in the sidebar at any time to wipe everything and start over with the original sample content. This cannot be undone, so use it only when you're sure.

Back up important data: since everything lives in your browser, consider printing or exporting anything important to PDF before clearing your browser history.

Frequently asked questions

Do I need an internet connection?

Only the very first time you open it, so a couple of small design fonts and chart graphics can load. After that, it works offline.

Can I use this on my phone?

Yes — the layout is fully responsive and adjusts to phones and tablets automatically.

I closed the tab, is my data gone?

No. Everything auto-saves as you type. Reopen index.html in the same browser and it will be exactly as you left it.

Can I use this for a small business?

Absolutely. The Finance Tracker, Notes and Goal Planner work well for freelancers and small business owners too.

The layout looks off on my browser, what do I do?

Make sure you're using a recent version of Chrome, Safari, Edge or Firefox, and that the whole Premium-Planner folder (not just index.html) was kept together when you unzipped it.

How do I get support?

Reach out through the same shop you purchased this from, and include a screenshot of anything unexpected — it helps enormously.

Thank you for choosing Mini Planner.

We hope it brings a little more calm and clarity to your everyday planning.
